Dear Forma Inc Hiring Manager,

My name is Zhiren Zhan. Thanks for the opportunity to apply the Software Engineer at Forma Inc. With the professional programming abilities and software developer working experience, I believe I am a perfect fit.

After taking the full stack developer intern in Tsinghua Internet Energy Research Institution, I found I was so eager to be a full stack and software engineer. Because I can deploy algorithms and present my creative ideas to clients. Currently, I am engaging in building my own web server including web page design, back-end apps, PostgreSQL database connection and daily maintenance. Before this, I have finished several fascinating projects with my friends or colleagues, such as C++ project "Smart Guide" and "Robot Soccer" by assembly language. Therefore, I am able to work within the team or solo the projects.

Being software engineer matches my abilities as well as fulfills my enthusiasm and interests. Also, I am keen to learn more professional coding ability or working experience during the job. I am so exciting to join the Forma Inc and make the contribution.

I am looking forward to show that my abilities and passion will benefit group. And I am thrilled to obtain more information about software engineer in the Forma Inc.

Best regards,

Zhiren Zhan
